NON-GMO Soybean Contract Addendum and Terms

All NGMO soybeans must test 99.9% pure

SDSP has put together a bidding structure for an intended delivery time frame when beans are forward contracted. However, in a situation where SDSP experiences plant production issues, SDSP reserves the right to request an alternative delivery time.

General Terms of this addendum:

- a. Grower agrees to maintain the Non-GMO identity preservation through all facets of production and storage. All soybeans contracted for delivery from September through August of the crop year will be scheduled for delivery no later than August 31 of the current crop year. (A crop year is September 1 – August 31.)
- b. Soybean deliveries will be on a buyers call status, however the seller must contact SDSP 2-3 weeks before they wish to deliver to get on the buyers call schedule for delivery. Pricing and payment of soybeans will be as follows:
 - a. Grower enters into a Priced or Basis Only contract when committing the bushels.
 - b. SDSP may allow beans to be scheduled before contracted.
 - c. If Grower requests delivery and beans are not contracted, beans will be spotted at 1:00 the next business day after delivery.
- c. GROWER is responsible for the risk of loss of the crop. SDSP holds no responsibility in the production of the crop.
- d. Soybeans will be subject to quality discounts for any grain not meeting the #1 YSB discount schedule, which can be found at www.sdsbp.com or by contacting our office at 1-888-737-7888. The quality discounts are subject to change at any time.
- e. Grower agrees to submit representative sample of the NON-GMO soybeans 10 days prior to scheduled delivery if requested by SDSP.
- f. If grower fails to meet contract specification, grower is still responsible to deliver contracted NGMO bushels.
- g. The soybean Checkoff Assessment is applicable to all soybean bushels sold.
